HTML5, CSS3, Javascript, Bootstrap, Node, MySQL, MongoDB, Express, Handlebars, and React.

PROJECTS

Tech Blog | **github.com/samanthaahn/tech-blog** | **JS, CSS, Express, Handlebars, Sequelize**
A tech blog where people can post their thoughts about technology
- Create an account to comment, post, and create your own blog.
- I was responsible for the whole project and created it from scratch.

Food Critics | **github.com/samanthaahn/food-critics** | **JS, CSS, Express, Handlebars, Sequelize**
A site where people can enter in their own recipes, comment, and find food inspiration.
- Create an account to comment and add in your own dishes!
- I was responsible for the backend portion, seeding, and creating the routes/models

Lit List | **github.com/samanthaahn/fiesta-event** | **JS, CSS, HTML**
A site where people can search for a book or movie by author or genre
- Using the Google API find thousands of books to read or movies to watch
- I was responsible for integration and use of the Google API
